# amazon-braket-ocean-plugin

***Release 1.0.12.dev0***

**Jul 12, 2022**

# Contents

1 Indices and tables 3

The Amazon Braket Ocean Plugin is an open source library in Python that provides a framework that you can use to interact with Ocean tools on top of Amazon Braket.

Here you'll find an overview and API documentation for Amazon Braket Ocean Python Plugin. The project homepage is in GitHub, https://github.com/aws/amazon-braket-ocean-plugin-python, where you can find the source and installation instructions for the library.
